PROFILE

Hi, my name is Zofia, and I´m a designer and educator.
I've spent the last nine years practising and teaching transportation design at the Academy of Fine Arts and Design in Bratislava. During my doctoral studies, I mainly focus on virtual and digital sketching. Since I discovered Gravity Sketch, I additionally explore the possibility of materialization 3D sketches, I don't have just a passion for design and drawing, but I also love teaching. I enjoy sharing the experiences and skills with my students. I love to give what I´ve learned via youtube, articles, and other forms of social media. I believe that I can encourage others to develop their design skills. Anyone can learn to design beautiful objects, and I´m here to help you with it!
